

Colonial Pipeline Company

Colonial Pipeline Facts

- Colonial is the largest refined products pipeline in the U.S. transporting more than 100 million gallons, or 2.5 million barrels, per day.
- Colonial transports gasoline, diesel, kerosene, aviation fuels and home heating oils. All products are moved through the same system, using a process called batching.
- Colonial transports approximately 45 percent of all fuel consumed on the East Coast, providing refined petroleum products to more than 50 million Americans.
- Colonial is connected to 29 Gulf Coast refineries and two in the Northeast.
- Colonial transports fuel to seven airports, including Washington Dulles International, Baltimore/Washington International and Hartsfield-Jackson Atlanta International.
- Colonial supplies approximately 90 military installations via four fuel depots.

Connectivity

Value

Reliability

Colonial Pipeline Company, founded in 1962, prides itself on a long history of connecting refineries – primarily located in the Gulf Coast – with customers and markets throughout the Southern and Eastern United States through a pipeline system that spans more than 5,500 miles. We strive to provide maximum value to our customers as we safely and efficiently deliver refined petroleum products to meet the energy needs of our nation.
