EFFECTIVE DATE

FERC 3.7.0 cancels FERC 3.6.0 (Docket No. IS17-411-000):

The Port Arthur Product Station ("PAPS") consists of tankage with lateral lines extending beyond PAPS to connect to (i) refineries in Port Arthur, (ii) Colonial Pipeline, and (iii) Explorer Pipeline. In addition, PAPS contains various lines within the station that facilitate the movement of product throughout the station.

Colonial's currently effective Tariff No. 3.6.0 provides for transportation of refined products from the Total Refinery (Total Tie In) to Port Arthur Products Station (Route 2), as well as other movements which are not related to the instant tariff filings. Tariff 3.7.0 proposes to add Footnote 2, clarifying that that movements over Route 2 are limited to distillate products only. Colonial does not have the physical assets necessary to provide gasoline services via this route. The PAPS facility has two separate inbound pipelines from the Total Refinery. The Total West Port Arthur Pipeline which is owned and operated by Total, only transports gasoline and delivers into a Colonial owned and operated manifold at PAPS which is dedicated to gasoline service. The Route 2, Total Tie In, which is owned and operated by Colonial, only transports distillate products and delivers into a Colonial owned and operated manifold which is dedicated to distillate service. The segregated gasoline and distillate pipelines are not designed to allow the crossover of products between the pipelines and manifolds. Accordingly, Colonial is adding Footnote 2 to clarify Route 2 is limited to distillate products only.
